## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-13, drawn to a composition comprising a charged active substance bonded to an oppositely bonded chitosan.

Group II, claim 14, drawn to method of preparing composition set forth above.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Claim 1 is drawn to a pharmaceutical composition comprising a charged active substance and an oppositely charged chitosan. ROY et al (WO 99/36090 - supplied by Applicant) discloses nanoparticulate negatively charged polynucleic acids in combination with positively charged chitosan. See pages 22-27.

Art Unit: 1623

It is noted that the composition is recited as a product-by-process, but the patentability is judged on the product itself, which in this case appears to be anticipated by the product of ROY.

It is further noted that the specification refers a German patent to define "nanosol," a critical definition in the instant invention. This is an improper incorporation by reference.

It is further noted that claims 8-13 are "use" claims. As they are currently written, they appear to recite intended uses for the composition of claim 1. If they are amended to be "method" claims, more in keeping with US practice, they may be subject to further restriction.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
